

CONSTRUCTION TECHNOLOGY

Purpose:

Students are given the opportunity to demonstrate knowledge, skills and talents learned in the area of a career/technology education class. Through the completion of individual projects, students will demonstrate technological literacy. These activity-based assignments better prepare students to become productive members of the industrial and technological community or to enter a post-secondary institution after graduation.

Description:

The contest is for entries that may be designed, produced or constructed by intervention program students as an outgrowth of career related interest in the construction field.

Examples:

Project ideas include, but are not limited to, the following areas:

Foundations and forms

Rough framing and/or roof framing

Exterior finish including, but not limited to installation of doors, windows trim, and or roof shingles

Interior finishing including, but not limited to installation of gypsum, paint, stains, trim packages

Heating and Air Conditioning

Masonry

Plumbing

Residential wiring

Tile laying
